## Innovation as a process: beyond ideation

---

Most people **resist change**. As a consequence, the main job of an innovator will be to drive adoption, by convincing people and organizations to **disrupt their routines**.

© Prof. Marco Balli, universitat de management

**Driving adoption** means demonstrating to key stakeholders that disrupting the status quo is **worth it** and that adopting the innovation will bring significant perceived benefits.

© Prof. Marco Balli, universitat de management

**Driving adoption** also means convincing key stakeholders that adopting new routines will be neither too difficult nor too risky, and that they and others can **easily make it happen**.

## Bibliography
