Innovation typology: beyond new products

(c) Prof. Benoît Gailly, Toulouse School of Management

Innovation is about both making new things (“**what**”) and making similar things in new ways (“**how**”).

© Prof. Bernd Schölkopf, Loyalty Model Management

Innovation is about **new value propositions**, new ways to market to and interact with customers. This means much more than developing new products.

© Prof. Bernd Schölkopf, Loyalty Model Management

Innovation is also about finding new ways to differentiate, and new **value curves that disrupt** competitors but not customers.

© 2018 IPdigit. All rights reserved. Innovation Management

Innovation is ultimately about designing **new business models** and new ways to deliver, share and capture value.

Bibliography

What is new: what vs. how
