## Build and manage innovation-ready organizations: how some elephants can dance

**Innovation-ready organizations** are not innovative for the sake of it. They combine operational efficiency with both the corporate culture required to continuously exploit and do things in new ways - innovative mindset - and the corporate structures required to explore and sometimes do completely new things - innovative ventures.

Innovative organizations manage to develop a corporate culture that fosters trust, learning and exchanges in order to **do things in new ways** and overcome the traditional organizational barriers to corporate entrepreneurship.

© Prof. Rainer Güll, University of Management

Innovative organizations can create dedicated structures where completely new **corporate ventures** can be nurtured and parented, leveraging their corporate assets while freeing “teenage” ventures from organizational inertia.

© Prof. Brent Davis, Lecture: Strategic Management

**Ambidextrous organizations** are designed and managed to retain the innovation agility of many small firms, such as flexibility, engagement and autonomy, while capturing the managerial efficiency of large corporations with their scale, assets and power.
