Why it matters: dynamic innovation management capabilities

NEW: Watch the executive summary

[Voir la vidéo](#)

Megatrends such as technology disruptions, international competition and sustainability affect firms across all sectors and industries, creating new competitive and social challenges.

Industries and sectors are also disrupted by new regulations, new customer needs and new technologies, forcing firms to reconsider the sustainability of their assets and activities.

Small and large firms across sectors must place innovation among their **strategic priorities** if they do not want to suffer the fate of the dinosaurs.

This implies developing **dynamic innovation management capabilities** to identify, select and capture the right innovation opportunities, in line with the firm's ecosystem and strategy.

Bibliography

Megatrends: beyond hi-tech

Keywords: ageing, artificial intelligence, China, creative destruction, digitalization, disruption, environmental innovation, globalization, green innovation, industrial revolutions, internationalization, obsolescence, sustainability, technological change, trends, VUCA, waves of innovation, wealth creation.
